

## Keeping Naples Comfortable for Three Generations

Joseph Patrick Brett had been in the air conditioning business in Northern Ohio for 16 years when he and his family relocated to Sunny Naples in 1972. The warm climate and the community's needs allowed the family to serve, and J.P. Brett & Sons, Inc. was launched as a family business. Dan Brett (the oldest son of 9) graduated from Akron University and moved to Naples to work on the service side of the company. He met his wife, Debbie and a short time later they were married in the Fall of 1977.

Dan and Debbie have been at the helm for over 40 years, running day-to-day operations.

For the last 10 years, Dan and Debbie have worked closely with their Son-in-law Benjamin Coakley (Married to daughter Jami Coakley), daughter Krystal Casey (Married to Son-in-law Brian Casey), and Son-in-law Casey Merriam (Married to daughter Monica Merriam) to ensure that the next generation holds the same values and integrity the company has been running over the past 50+ years. Dan and Debbie wanted to ensure that the future generation had the experience, knowledge, and understanding of their family brand from the ground up.

Our Values and Integrity are at the heart of JP Brett & Sons' operations, and our mission statement clearly explains this.

- To apply Biblical principles to do what is right, fair, and just to all parties involved.
- Provide our clients with quality services in a profitable manner to everyone involved.
- Reward our employees for their contribution to our success.

Over the past five years, Dan has slowly reduced his days at the office, entrusting the next generation to oversee the business's day-to-day operations.

In October 2024, Dan officially retired as President of JP Brett & Sons, turning the company over to his three daughters and their husbands.

Reflecting on the last 50 years, Dan would like to Thank the Naples Community for making our family business a success. We look forward to continuing the legacy of our family business with the next generation, who are committed to the same honest and reliable service you can trust.

## Employee Spotlight: CODY WILLIAMS

This employee spotlight comes from a member of our Service Department. Cody Williams serves as our Technical Advisor.

Cody was born in Okeechobee, Florida.

In 2017, Cody relocated to Naples and joined our JP Brett & Sons team as a Service Technician. He brought many years of experience and knowledge with him. It didn't take long for our management team to notice his skill level and ambition, advancing him to Technical Advisor in 2018.

As a TA Cody provides expert knowledge, support, and continuing education to our Service, Maintenance, and Installation teams. Should a challenge arise, our technicians know they can call on Cody and receive guidance as he walks them through solving any issue.

In Cody's free time, he enjoys spending time with his beautiful wife Michelle and their 3-year-old son Levi.

On most Saturdays, you can find Cody and Levi cruising the greens, playing a round of golf or with a fishing pole in hand helping Levi reel in a big fish. Cody loves his family and the memories they are making together.

We would like to publicly Thank Cody for seven years of dedicated service to JP Brett & Sons and our customers. Thank you for being a part of the Brett Air Conditioning family.

## A2L Freon, the next-generation, low-GWP refrigerant:

Many have heard the news about the new A2L refrigerant and we would like to answer some of your questions.

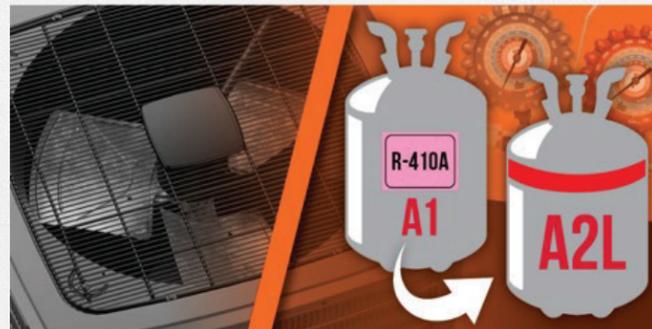

As of January 1, 2024, production was reduced by 40% for all refrigerants, including R-410A. As a result, a new type of refrigerant must be used. A2L refrigerants with a low Global Warming Potential (GWP) and A2L compatible equipment will begin replacing the 410A units we are used to.

Our JP Brett & Sons technicians have undergone numerous training courses to stay updated with the changes in this new refrigerant. We have equipped each of them with proper A2L-compatible equipment, parts, and tools to ensure adequate safety precautions when installing, maintaining, and servicing equipment with this new refrigerant.

Can A2L refrigerants be used to retrofit R-410a or R-22 units? No. They should only be used in systems specifically designed for this type of refrigerant. In a nutshell, the old refrigerant is not compatible. If your outdoor or indoor unit goes out, replacing the entire system with an A2L system will be required.

Are A2L Refrigerants Safe to Use? Safety is a primary concern when handling refrigerants. A2L refrigerants are considered safe when handled correctly. They have been rigorously tested and approved by regulatory bodies for use in HVAC systems.

Should you have any further questions, please call our office at **239-566-3633**.

**This Valentine's Day, give your loved ones  
the gift of fresh air with a**

**REME HALO ZERO WHOLE HOME IN-DUCT AIR PURIFIER**

**\*\*Special Offer \$844.00 Installed\*\***

**(\$200.00 Savings)**

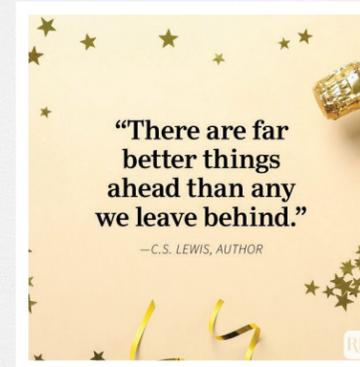

#### Benefits Include:

- One of the least expensive components of an air conditioning system yet can have one of the most significant impacts on your air quality.
- Active technology reduces viruses, bacteria, and odors at the source.
- Reduces odors from mold, pets, and old home smells.

It operates silently and continuously, so once it's installed, the only thing you'll notice is how fresh your home smells – and how comforting it is to help protect everyone around you.

\*Offer only valid while tech is at your home for maintenance or service call. Can't be combined with any other special or offers.

\*Space required in ductwork for installation.

## 5 Tips to starting the new year off right

It's the beginning of a new year, and you're excited to start the year off right. You promised yourself that 2025 will be the year you grow your business, advance your career, or maybe go deeper in your spiritual walk.

Here are five tips to help you start the New Year off right.

- 1) Set reasonable and specific goals.  
It's easier to move one thing forward a mile than ten things forward an inch. Make your goals attainable.
- 2) Create a plan.  
Now that you have your goals, write down the steps to attain them.
- 3) Talk about your plan.  
Share with Friends or Family to help hold you accountable and support you. Goals are not carved in stone. It's okay to reset and get back on track if needed.
- 4) Schedule time for yourself.  
Set aside quiet time each morning before you start your day. This will help keep your mind and heart free from distraction, allowing you to stay on track and focus on your goals.
- 5) Balance work and play  
In most cases, our job and day-to-day business take priority over many other things in our lives. Work isn't going anywhere. The greatest wealth you can build is time with those friends and family who support you in achieving and conquering your goals.
